Team Members	THAYANESHWARAN M,SAI KUTTHALINGAM S,SAI MEENAKSHINATHAN S,NATESAN I

The screenshot shows a VS Code editor with a file named `app.py` open. The file contains a Flask application with the following code:

```

1 from flask import Flask
2 from flask import render_template, request, redirect, url_for, session
3 from werkzeug import secure_session
4
5 import os
6
7 app = Flask(__name__)
8
9 @app.route('/')
10 def home():
11     return render_template("home.html")
12
13 @app.route('/addstudent')
14 def add_student():
15     return render_template("add_student.html")
16
17 @app.route('/address', methods = ['POST', 'GET'])
18 def address():
19     if request.method == 'POST':
20         name = request.form['name']
21         address = request.form['address']
22
23
24
25

```

The terminal output shows the command `flask run` being executed, and the output is:

```

PS C:\Users\USER> flask run
Running on http://127.0.0.1:5000
Press CTRL+C to quit

```

The status bar at the bottom indicates the file is named `app.py` and is located in the `C:\Users\USER>` directory.
